

PIPEONTEC
KEEP YOUR PIPELINES UP AND RUNNING

YOUR TRUSTED PARTNER IN PIPELINE INTEGRITY & REHABILITATION SERVICES

www.pipeontec.com

About Us

Engineering Certainty. Delivering Continuity.

At PIPEONTEC, our mission is to deliver operational excellence by ensuring process continuity and enhancing the long-term reliability of critical infrastructure. We are a trusted provider of advanced pipeline maintenance, repair, and testing solutions, purpose-built to meet the rigorous demands of the global energy sector.

With a deep understanding of industry challenges, we offer a comprehensive suite of high-performance engineering services, including:

- ▶ **Specialized pipeline interventions** using cutting-edge temporary isolation technologies
- ▶ **Emergency under-pressure repairs** and rehabilitation for live systems
- ▶ **Advanced pipeline testing and inspection** utilizing modern diagnostic tools
- ▶ **Mechanical joint integrity management** to ensure safe and leak-free operations

Our solutions are designed not just to solve problems—but to prevent downtime, extend asset life, and maximize productivity in both onshore and offshore environments.

With a strategic footprint across the Middle East, Africa, and Caspian regions, PIPEONTEC is positioned to support clients wherever pipeline integrity is mission-critical. Whether it's a complex intervention or a time-sensitive repair, we respond with speed, precision, and professionalism.

Backed by a visionary leadership team with over 20 years of industry experience, we bring more than just technical capability—we bring a mindset of innovation, accountability, and problem-solving. Every project is an opportunity to exceed expectations. Every partnership is grounded in trust, transparency, and results that speak for themselves.

**At PIPEONTEC,
we don't just maintain pipelines we protect performance.**

• Certificate •

Our Vision

To be the most trusted and innovative partner in pipeline intervention and integrity solutions, setting industry benchmarks for safety, reliability, and performance across global energy markets.

Our Mission

Our mission at PIPEONTEC is to solve critical pipeline challenges through precision engineering, rapid response, and tailored maintenance strategies that keep industrial operations running safely and efficiently.

Our Core Services

Delivering Precision Pipeline Services
for Critical Industrial Demands

**Hot Tapping &
Line Stopping**

**Leak Sealing
& Live Repair**

Pipe Freezing

**Online Valve
Testing**

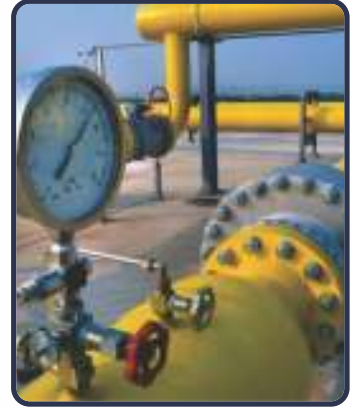

**Valve Flushing
& Lubrication**

**Bolt Torquing
& Tensioning**

**Onsite Machining
& Cold Cutting**

**Process &
Pipeline Services**

**Pigging &
Inline Inspection**

Drilling & Milling

**Anti Corrosion
Coating**

Composite Wrapping

Hot Tapping & Line Stopping

- Enables pipeline modifications without shutting down operations
- Supports diameters up to 84" & ANSI 150# to 900# pressure ratings
- Applicable to carbon steel, stainless steel, GRE, & more

Leak Sealing & Live Repair

- Live leak sealing on flanges, valves, pipe walls, and gaskets
- Avoids shutdown during critical leak situations
- Custom-designed clamps & injection techniques
- Suitable for hydrocarbons, steam, chemicals, and water lines

Pipe Freezing

- Creates a solid ice plug to isolate sections of pipe temporarily
- No need to drain or depressurize the system
- Safe for chilled water, potable water, & various fluids
- Supports carbon steel, copper, stainless steel & more

Online Valve Testing

- Non-intrusive in-service testing solution that certifies the safety valve's functionality
- No shutdown or disassembly required from the pipeline
- Full compliance with safety & regulatory standards

Valve Flushing & Lubrication

- Cleans, flushes, & lubricates valves without disassembly
- Prevents seizing and corrosion in long-idle valves
- Helps extend operational life and ensures better performance

Bolt Torquing & Tensioning

- Ensures proper bolt preload using hydraulic tools
- Prevents flange leaks and mechanical failures
- Services include torquing, tensioning, flange management
- Suitable for critical joints in pressure vessels & pipelines

Flange Facing & Cold Pipe Cutting

- In-situ machining of flanges and pipes using portable equipment
- Delivers precision-facing, beveling, & pipe cutting
- Ensures leak-free connections & proper weld prep
- No heat or spark generation – safe for hazardous zones

Process & Pipeline Services

- Provided end to end pre-commissioning & commissioning supports to critical pipelines
- Services include Hydrotest, Pneumatic test, Dry Air Flushing, Nitrogen Purge, Helium leak testing, Lube oil flushing etc
- Tailored for oil & gas, power plants, & utilities

Pigging & Inline Inspection

- Pipeline cleaning, gauging, & debris removal services
- Advance MFL & UT technologies to identify pipeline integrity, metal loss anomalies due to corrosion.
- Real-time data & advanced reporting for proactive decision-making for asset owners

In-situ Drilling & Surface Milling

- On-site mechanical milling, drilling, & surface cutting
- Eliminates need to dismantle large pipe sections or structures
- Used for bolt hole repairs, profile cuts, & mounting points

Product

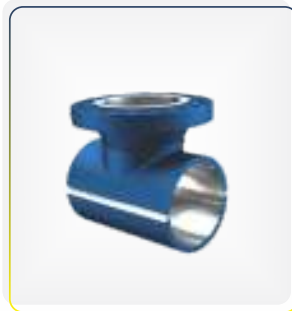

Hot Tap & Line Stop Products

**Reinforcement
Saddles**

**Line Stop
Fittings**

**Full Encirclement
Hot Tap Split Tee**

**Line Stop Head &
Sealing Elements**

**Cutters &
Pilot Drills**

**Sandwich
Valves**

**Hot Tap
Machines**

**Plugging
Machines**

Flange management Products

**Hydraulic Pumps
& Accessories**

**Hydraulic Bolt
Tensioners**

**Hydraulic Torque
Wrenches**

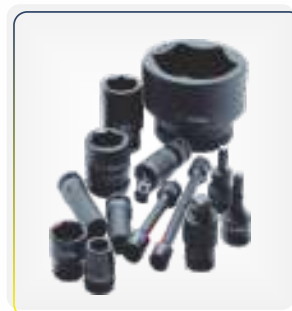

Hydraulic Jacks

Flange Spreaders

**Hydraulic Nut
Splitter**

Impact Sockets

Non sparking Tools

On Site Machining

**Cold Cutting
upto 72"**

**ID Flange Facer
upto 5 meter**

**OD Flange Facer
upto 5 meter**

**Milling Machine
with Gantry**

Exchanger Retubing

**Electric Tube
Cleaner**

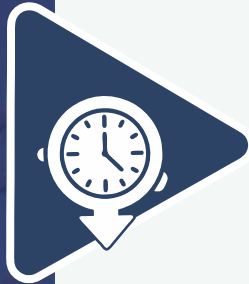

**Electric Tube
Expansion System**

Tube Expander

Why PIPEONTEC

Minimal Downtime

We perform complex interventions on live systems without halting production.

Certified Expertise

Our engineers are trained & qualified to deliver solutions aligned with international standards (ASME, API, ISO).

Regional Reach

With operations across UAE & the wider GCC, we bring rapid response & local support to client sites.

Safety & Compliance

Adherence to ISO 9001, 14001, & 45001 ensures our processes are safe, sustainable, & quality-assured.
